# Exploring Cannabis-Infused Gummies: Flavorful Edibles for Cannabinoid Consumption

### THE APPLICATION SCOPE / PURPOSE

A cannabis-infused gummy is a type of edible product that contains cannabinoids, typically THC (tetrahydrocannabinol) and/or CBD (cannabinol), which are derived from cannabis plants. These gummies are made by combining cannabis extract or oil with other ingredients to create a flavorful and convenient way to consume cannabinoids. The key of the production of such products is all in the mixing. Kinematica provides solutions to evenly disperse the gummy's ingredients to achieve a high-quality product.
