## COSMETICS

# Dispersion of foundation at high viscosities

### THE APPLICATION SCOPE / PURPOSE

The formulations for cosmetic foundations vary widely. The base can be oil / water / alcohol / mineral or silicone based and the colour and texture can also change. As Kinematica mainly works with liquids, we offer solutions for liquid foundations. Here the difficulty of dispersion lies in the high viscosity. With Kinematica equipment, temperature, pressure and pH can be controlled and adjusted, so that a constant production of liquid foundation is possible.
